Dear Mr. Davidson,

Just returned from N.O. and further than ever behind. Many thanks for yours of 12/8.

You may be right on Betty Parent (whose name turns out to be Parrot. How accurate can one FBI man or bureau be ?)

I disagree with you about the meaning of 1444 re Gongora, who is a certified paranoid in competent US institutions. He interest was not in JFK. What we have is not his story but a version of it. I have nothing against this sick man but much against those who tried to use him for a CIA-type diversion when the Garrison case broke. He can no more help his disease than another can a broken leg.

I didn't print the photos I located because Icould not buy them. I turned this aspect over to those who could-and did. What they have and what they have bought I really do not know, for I turned this over to them and devote my time to other things no one else seems to be working on. I believe they do have some such pictures, but the clarity I know nothing about. Dick Sprague is the best one.

Began this two hours ago and was interrupted. It is almost 1 a.m. and I have no more time.

Best regards,

Harold Weisberg
